DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, drawn to an article, classified in class 428, subclass 1.1.
 - II. Claims 3-10, drawn to a method, classified in class 156, subclass 380.3

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the method of producing the liquid crystal display device can include an additional step of adding a surfactant to the monostable ferroelectric liquid crystals in order to facilitate the step of applying a DC voltage across the upper electrode and the lower electrode in order to uniformize the helical axes of the liquid crystal molecules homogenously.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
